“The number of cancer survivors continues to grow, yet high-quality, coordinated survivorship care is still infrequent,”

— experts from the National Academies of Sciences, Engineering, and Medicine

- According to the American Cancer Society, there are over 15.5 million Americans living with Cancer
- The Institute of Medicine warned that many survivors were “lost in transition” and weren’t getting adequate follow-up care.

Goal of our Program:
To help you manage your health and wellness throughout all the stages of cancer therapy, recovery, and beyond

With these statistics in mind, our team of clinicians at RMG has decided to take action and assist in comprehensive follow up care for cancer survivors.

The Cancer Support Program

Chemotherapy and Radiation not only kill and slow the growth of cancer cells, the effects can also extend to nearby healthy cells. Damage to healthy cells can cause numerous side effects.

The purpose of this program is to minimize the harmful effects on your body and overall lifestyle throughout the treatment process until recovery and beyond.

Our program will create a personalized, individual protocol for your distinct health needs and requests. We will try to target all aspects of the effects of cancer and chemotherapy in your life. Especially taking into account the side effects and nutrient depletions that commonly result from cancer treatments.

Personalized Protocols

We will design an individualized, personal protocol specific to YOU and your concerns. Some of the components of your personalized package may include:

- Intravenous therapies to replenish nutrients, electrolytes and fluids
- Brain Training to assist with cognitive function (anxiety, depression, insomnia, memory related issues.. etc)
- Virtual Reality, aromatherapy, music therapy and meditation options for stress and anxiety relief
- Reality Rehabilitation with our Kinesiologist to rebuild and enhance strength and muscle tone
